

Dear Sir/Madam.

Re: Application for Employment

I have gained experience in the IT field, through part-time employment at Re-invent IT and Meals on Time.

I was responsible for assisting clients in making IT challenges for them as easy as 1, 2, 3. At Meals on Time I assisted with the Point of Sale and preparation of foods. I have completed my Matric in 2021 and currently pursuing a Bachelor of Science in Mathematics and Statistical Sciences at UWC.

I have applied all my research before working at these companies. Therefore, my knowledge and many more that I have grasped along the way from my employers ensured 100% customer satisfaction. Developing happy environments for my employers so their businesses can run smoothly.

Coding is a strong passion of mine. I began coding in high school, I started with Delphi as per the curriculum but I learnt other languages on my own. I have basic to intermediary knowledge and application in HTML5, CSS, Python and Pascal. I am a critical thinker and enjoy solving puzzles, which is why I enjoy coding, it allows me create solutions to problems too complex for traditional methods.

Although I have limited experience in the IT field, I am a fast learner and consider coding more than a hobby or pass time. Further information about my career path and qualifications can be found in the attached CV. I would welcome you the opportunity to discuss my experience and qualifications with you in more detail.

I look forward to hearing from you soon.

Thanking you,  
Viroshen Sewpaul

Duration: During School Holidays.  
Reason for leaving: Temp.  
Reference: Avesh 0716059209

Extracurricular Activities:

- Cycling
- Coding
- Gaming
- Painting

My strengths are being optimistic, working well in teams, working under pressure and always meeting a deadline before the required time. My three most important ethics are cost, time and quality.

I am the best person for this position because I bring quality and passion for excellence. I am committed to producing truly world class results.

Within 5 years I would like to become the very best IT systems developer a company has on staff. I want to work towards becoming the expert that others rely on and, to master multiple programming languages.

My education has focused on not only learning the fundamentals but also on the practical application of the information learned.

I am very much a team player and I find that the best results are obtained when members of a team work coherently.

My greatest weakness is that I prioritize quality over time constraints, however I have never completed a project after the deadline.
